SUMMARY

Software Engineering student focused on full-stack web development, backend systems, and AI-driven applications. Experienced in building scalable applications with the MERN stack and Python, integrating LLM APIs (OpenAI GPT, Gemini), and designing optimized database architectures. Proficient in OOP and RESTful API engineering with a strong foundation in translating complex technical requirements into user-facing digital platforms.

EDUCATION

Sukkur IBA University

BS Computer Science

Sukkur, Pakistan

2022 - 2026

Coursework:

- Object-Oriented Programming (OOP)
- Data Structures and Algorithms (DSA)
- Database Management Systems
- Web Application Development

TECHNICAL PROJECTS

SIBA Digital Academic Support Platform (SDASP) - Final Year Project

- Architected full-stack academic support platform using MongoDB, Express, React, and Node.js.
- Integrated OpenAI GPT and Gemini APIs to automate high-accuracy, real-time responses for student queries.
- Implemented secure JWT authentication and granular role-based access controls for users and administrators.
- Designed and optimized efficient RESTful APIs to streamline data synchronization between the frontend and database.

AI Chatbot for Sukkur IBA

- Developed transformer-based conversational AI model optimized for handling university information systems.
- Implemented natural language processing (NLP) pipelines in Python to accurately classify and resolve academic queries.
- Engineered an interactive, real-time user interface utilizing Streamlit to ensure seamless user engagement.

Event Management System

- Developed a desktop event booking application utilizing Java core engineering and a relational MySQL backend.
- Built robust, modular systems to handle end-to-end user registration, event scheduling, and booking workflows.
- Structured advanced admin controls and database transactions to ensure data consistency and system stability.

Portfolio Website

- Designed and deployed a responsive personal portfolio website to feature technical skills and repositories.
- Applied modern UI/UX principles with HTML and CSS to ensure cross-browser compatibility and optimized page load times.

EXPERIENCE

Web Development Intern | Students' Empowered Oasis(SEO)

June 2026 – Present

- Customize and configure responsive WordPress websites using advanced themes, plugins, and custom styling layouts.
- Manage dynamic content updates, front-facing page layouts, and media blocks to maximize user engagement metrics.
- Conduct diagnostic troubleshooting and performance optimization to maintain high website availability and clean structure.

LANGUAGES AND SOFTWARES

Languages: JavaScript, Node.js, Python, Java, C++, SQL, HTML, CSS

Backend & APIs: Express.js, RESTful APIs, Node.js

Databases & Tools: MongoDB, MySQL, Git, GitHub

AI/ML & Data: OpenAI API, Gemini API, NLP, Hugging Face, NumPy, Pandas, Scikit-learn

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), System Design
